experience

Lead User Experience Design Intern - Tugolo

Kitchener, ON | May 2019 - August 2019

Re-designed Tugolo's entire web interface and took control of the mobile platform design, a key part of the company's target group, while working in a 5-person team of one other designer and three developers.

Implemented wireframes and high-fidelity models, compiling user feedback and testing closely with other employees.

UX/UI Designer - TasteBuds

Vancouver, BC | January 2020 - Present

Actively helping the design responsibility for a start-up and making adjustments on the current interface to present a more simple and intuitive look.

Highly involved in designing the user's profile and statistics of their progress with and motivated by user feedback.

community

Business and Design Mentor - StarterHacks at University of Waterloo

January 2020 - January 2020

Mentored students with potential routes and tactics on executing with a balanced business model.

Used advantage of my dual background in business and design to apply real world concepts to fledgling projects that needed fleshing out.

Web Designer - The Grace & Nelly Project

Winnipeg, MB | May 2020 - Present

Working closely with all G&N members, I am re-designing its website and refreshing the theme for improved intuitivity of the content while giving suggestions for successful execution in the business plan.

Building a Shopify page to sell products and determining the most effective way to reach customers through quantitative data.
